We are better together
We enable you to treat your patients on the best tables.
# OPERATING TABLES

### Electrical Movements
- Height
- Back Rest
- Trendelenburg
- Reverse Trendelenburg
- Lateral Tilt
- Sliding

### Mechanical Movements
- Head Rest
- Kidney Surgery Position
- Leg Rests, Up / Down
- Leg Rests, Right / Left
- Central Locking

### Sizes
- Width x Length: 610x2130 mm (2P)
  - 610x2040 mm (2V)
- Height (min): 810 mm (2P) | 840 mm (2V)
- Height (max): 1210 mm (2P) | 1240 mm (2V)

*Max & min. dimensions are measured with mattress.*

Üzümcü OP-2P operating tables are designs which can be adjusted to get positions suitable for carrying out all surgical operations, produced by considering the patient and user requirements and maximize the operational efficiency.

![Safe patient positioning](image)

- Safe patient positioning
- 2 sections back rest Remote Control with kidney elevation
- Rapid Mobilization
- Conductive castors with central locking system

- Touchscreen remote control

![Remote Control with kidney elevation](image)

![Safe patient positioning](image)
The optional patient heating system of the OP-2V table enables to keep the patient’s heat stable with 0.1°C accuracy. The system shows measured and set temperatures on a LCD display at the same time. The heating device has an advanced alarm and safety system.

Üzümçü OM-6L table is designed for bariatric surgery. 29” extra-wide table top enables easy positioning for bariatric patients.

- **29” extra-wide table top**
- **Heavy duty lifting column**
- **Special PU matters design** for the comfort of bariatric patients.

Nano surface protection technology is easy to clean, highly resistant to corrosion and has an antibacterial effect that prevents the production and inhabitation of blood and body fluids on the surface.
OPERATING TABLES

Detailed Specifications

< Functional Design & Wide Range of Accessory Options
- Modular design taking shape by different surgical operations with high stability
- Solutions ensuring to reach the position required by any kind of surgical operations with its wide range of accessory options
- Telescopic body specifications enabling height adjustment at different levels
- Wheel system which is made of ABS plastic, with high multi-directional mobility and 125 mm in diameter (OP Series)

< Sliding
- Image reception ability in a wide area without disturbing the sterile environment with the flouroscopy device by its slideability within 300 mm on horizontal plane

< Optimal Clearance In Surgical Area
- Maximum surgical area visibility and operational success with kidney surgical elevator integrated on the table and that can be adjusted up to 300˚(120 mm)

< Different Mattress Options
- High-quality image reception facility with table top made of compact material with high x-ray permeability
- Visco or polyurethane mattress options ensuring patient comfort by taking shape of body parts of patient and preventing decubitus prophylaxis
- Cleanable and sterilizable mattress for decontamination of operating room with its seamless structure and demountability

< Modular Design
- Design that can get different angles according to the operation’s kind, demountable head and foot plates
- Unlimited perineal accessibility with demountable foot plate
< Easy Approach For C-Arm
• Possibility to have high image quality from all parts of the table with X-ray permeable table top
• Suitable base structure for easy access and approach of the C-arm scopy and surgical microscopes

< Accessory Positioning and Battery System
• Attachment system mountable on stainless steel rail integrated on both sides of the table, enabling connecting a new accessory without demounting existing accessories and preventing loss of time.
• Possibility of positioning the table in case of electricity cuts thanks to the rechargeable battery system that guarantees thirty movements.

< T Base Specifications
• T Base enabling surgical team and equipment to approach the table optimally and contributing to operational success
• 316 quality stainless steel body resistant to fractures and corrosion
• Silent and nonvibrating operation

< Remote Control
• Multi control system with wireless touch screen tablet, hand set and body control panel
• Rapid recall in case of need by storing five different surgery positions
• Position reset by a single button
• Easy use in endosurgery operations thanks to the illuminated screen

< Optimum Mattress Performance
• Uzumcu operating table mattresses are designed and manufactured according to the Pressure Mapping test results. These tests are performed in house test systems in Uzumcu factory.

Detailed Specifications

< Functional Design & Wide Range of Accessory Options

- Modular design taking shape by different surgery operations with high stability
- Solutions ensuring to reach the position required by any kind of surgery operations with its wide range of accessory options
- Telescopic body enabling height adjustment at different levels

< Ergonomic Positioning Arms

- Trendelenburg/reverse trendelenburg and spine positioning arms that are easily accessible and enables ergonomic use

< Table Top Specifications and Lateral Use

- Cleanability and sterilizability suitable for decontamination with its seamless structure and demountability
- High-quality image reception facility, table top being made of compact material with high x-ray permeability
- Right-left lateral tilt arm, practical to use and integrated with the operation table, enables mobility for the surgery team and can be hidden under table sitting plate when not in use

< T-Base Specifications

- T-Base contributes to operational success by enabling optimal approach of surgery team and equipment to table
- 316 quality stainless steel body resistant to fractures and corrosion
- Silent and non-vibrating operation

< Breaking System & Hydraulic Lever

- Wheel system enabling mobility in the operation room
- Brake system enabling positioning in the required position
- Telescopic body with height adjustment at required level by hydraulic pedal

- Design compatible with digital and conventional x-ray units
- Carbon fiber floating tabletop within the imaging area and with high X-ray permeability at ≤0.43 mmAL
- Multi-directional wheel system

XT-15
1100 mm carbonfier tabletop without any metal part enables various patient positionings. Low X-Ray absorbition carbonfiber materials get high clear images. It extends the X-Ray machine Spheroid’s tube lifetime.

**Table Top Movements**

- **X Axis Movement**: 820 mm
- **Y Axis Movement**: 220 mm
- **Vertical Movement**: 275 mm

• Ergonomic hand control unit enables height adjustment and floating plate movements
Üzümçü JM-4F Gynecological Table is a model suitable for any kind of gynecological examination and operation, contributing visually to the operation environment with its different colour options.

- Durable steel body with electrostatic paint
- Visco elastic seamless mattress ensuring hygiene conditions and patient comfort. It can be easily cleaned in accordance with hospital decontamination rules
- Easily replaceable leg and foot rest accessories can be used for different gynecological operations
- Durable steel body with electrostatic paint
- Height Adjustment: 720 - 970 mm
- Trendelenburg: 20˚
- Back Rest: 50˚
- Ergonomic examination and diagnose possibility for the doctor
- Height adjustment, Trendelenburg position, and back section can be adjusted both by hand and foot control for easy and fast positioning
